

Turbine Number	Design Changes
T1	Turbine height reduced to 180m to reduce visibility from the west
T2	Turbine height reduced to 180m to reduce visibility from the west and moved away from areas of deep peat
T3	Turbine height reduced to 200m to reduce visibility from the west
T4	Moved to clear infrastructure from watercourse buffers (previously named turbine 6)
T5	Turbine height reduced to 200m to reduce visibility from the west (previously named turbine 7)
T6	No changes (previously named turbine 18)
T7	Turbine height reduced to 200m to reduce visibility from the south
T8	Moved to clear infrastructure from watercourse buffers (previously named turbine 9)
T9	Moved away from areas of deep peat (previously named turbine 5)
T10	Moved to improve turbine spacing (previously named turbine 10)
T11	Moved away from areas of deep peat (previously named turbine 10)
T12	No changes
T13	Turbine height reduced to 200m to reduce visibility from the south
T14	Turbine height reduced to 200m to reduce visibility from the south
T15	Turbine height reduced to 200m to reduce visibility from the south
T16	Moved to clear infrastructure from watercourse buffers
T17	Moved to improve turbine spacing (previously named turbine 19)
T18	Moved to clear infrastructure from watercourse buffers (previously named turbine 17)
T19	Turbine moved and height reduced to 180m to reduce visibility from the east (previously named turbine 22)
T20	Turbine height reduced to 180m to reduce visibility from the west and moved away from areas of deep peat
T21	Turbine height reduced to 180m to reduce visibility from the east
