Proposed Turbines

- 180m (Tip)
- 200m (Tip)
- 230m (Tip)

Site Boundary

Distance from Proposed Turbines (5, 15, 25, 35km)

Cumulative Turbines

- Operational
- Consented
- Viewpoints

- VP1 - High Stennies
- VP2 - Minor road near Barrnglieshead
- VP3 - Collin Burn
- VP4 - Milltown
- VP5 - Calfield
- VP6 - B6318 north-west of Claygate
- VP7 - Langholm Bridge
- VP8 - Malcolm Monument, Langholm
- VP9 - Longtown
- VP10 - Burnswark Hill Fort
- VP11 - A7 near Unthank
- VP12 - Gowness-on-Solway
- VP13 - Caerlaverock Castle
- VP14 - Banks, Hadrian's Wall
- VP15 - Greta Green/Springfield
- VP16 - Kirkpatrick-Fleming
- VP17 - Repentance Tower, Hoddam

Zone of Theoretical Visibility (ZTV)

This drawing uses tip heights for both proposed, operational and consented turbines. It is based upon computer generated Zone of Theoretical Visibility (ZTV) studies produced using the viewshed routine in the ESRI ArcGIS Suite. The areas shown are the maximum theoretical visibility, taking into account topography, principal woodlands and settlements, which have been included in the model with the heights obtained from Nextmap 25. It should be noted that in some areas woodlands included within the ZTV may comprise active forestry, resulting in the felling and replanting of some areas modelled in the ZTV study. The ZTV study reflects this pattern at a specific point in time, as it is based on real height information. Whilst the felling cycle will alter the heights of different areas of forestry over time, altering localised visual effects, the wider pattern will remain relatively constant.

The model does not take into account any localised features such as small copses, hedgerows or individual trees and therefore still gives an exaggerated impression of the extent of visibility. The actual extent of visibility on the ground will be less than that suggested by this plan.

The ZTV includes an adjustment that allows for Earth's curvature and light refraction. It is based on Nextmap 25 terrain data and has a 25m²
